RE: Downstream Sewer Assessment Fee

DT: April 1, 2024

The Downstream Sewer Assessment fee is a fee we collect during permit issuance for proposed sewage that flows through existing infrastructure (typically lift stations) in the sewershed serving the proposed development. Depending where the proposed building is constructed determines if and what assessment fee is charged. The fee increases with the total amount of lift stations needed to service that sewershed. One station one charge, two stations is two charges, and so on. This fee is intended to recover capital cost of lift station upgrades, replacements, or construction.

I am requesting that lift station #16 (Dolby) be added to the list so that we can start charging for connections to this station. This station flows to lift station #12, so there is a double charge for Dolby.

At this time, I would also like to increase the base rate for a single station from \$400 to \$500. These rates have been the same since implementation and the costs to construct and maintain these stations has continued to rise. The new rates would be \$500, \$1,000, and \$1,500 respectively.

I am also requesting to add a downstream fee for the reimbursement of the North Ross gravity sewer main that will be constructed for the Phase II of the Western Sussex Business Campus. This main was to be constructed as part of an earlier development that has not built out yet. This way we can recoup some of our cost eventually as the developer builds the development out in the future. The infrastructure will already be there for him to connect to.

Please present this information to Mayor and Council at their April 9, 2024 meeting for their consideration.

Please contact me should you have any questions.
